

Phan Huynh Minh Thinh

Software Engineer

✉ minhthinh.221005@gmail.com | 📞 (+84) 98 4250 431 | 🌐 Portfolio | 🏠 GitHub | 📍 Ho Chi Minh City

Summary

Fullstack Software Engineer with over 1 year experience specializing in **JavaScript/TypeScript** and the **React** ecosystem. Experienced in building scalable web applications using **React**, **Node.js**, and **Django**, with a strong focus on writing clean, maintainable code. Proficient in **RESTful API** development and **Software Design Patterns** to deliver efficient, enterprise-standard solutions in collaborative agile environments.

Technical Skills

Programming	JavaScript, TypeScript, Python, C#, Java
Frameworks	NodeJS, Django, .NET, React, Angular, Redux, TailwindCSS
Database	PostgreSQL, SQL Server, Neo4j, MongoDB
Tools & Cloud	Docker, Git, AWS, Azure, Jira
Competencies	OOP, API Integration, Agile Development, System Design
Languages	English (Professional working proficiency)

Work Experience

NAB Innovation Centre Vietnam - Software Engineer July 2026 – Present

- **Program Focus:** Selected for the highly competitive Starcamp program to develop and scale enterprise-grade financial technology solutions. environment.

BOSCH Global Software Vietnam (BGSV) - Software Engineer Intern March 2026 – June 2026

- **Lab Management System** (Stack: *ReactJS, Redux Toolkit, Python/Django, MinIO*)
 - **Backend Architecture Refactoring:** Spearheaded the transition from a legacy monolith to **Vertical Slice Architecture**, reducing cross-module coupling by **30%** and significantly accelerating the CI/CD pipeline and feature isolation.
 - **Frontend Modernization & Optimization:** Migrated the entire global state logic from Redux Saga to **Redux Toolkit Query**, eliminating **40% of boilerplate code** and improving application performance through optimized middleware and state selectors.
 - **On-premise Cloud Storage Infrastructure:** Engineered an **S3-compatible** object storage service using **MinIO** on local enterprise servers, achieving **100% data sovereignty**. Secured external access by configuring **Nginx** as a reverse proxy with **SSL/TLS** certificates.

ETECHS - Software Engineer Intern Oct 2025 – Jan 2026

- **Agricultural Sales Management System** (Stack: *ReactJS, Python/Django*)
 - **Description:** A digital transformation system for managing sales operations, inventory, and waybills.
 - **Responsibilities:** Developed Frontend (ReactJS) & Backend (Django) features following coding standards; implemented **Automation Testing** to ensure system stability.
- **Corporate Landing Page** (Stack: *ReactJS, Python/Django, Tailwind*)
 - **Description:** A responsive landing page showcasing company services with SEO optimization.
 - **Responsibilities:** Built the full-stack solution, translating designs into code and implementing backend CMS.

Projects

HKT Karaoke Booking Website May 2025 – Sep 2025

Solo Developer | Stack: ASP.NET Core, ReactJS, Redux, SQL Server, Azure

- **Links:** GitHub Repo | Live Demo
- **Description:** Booking system with customer portal and admin dashboard.
- **Responsibilities:**
 - Constructed maintainable backend with **ASP.NET Core** following **Clean Architecture**.
 - Developed feature-rich frontend using **ReactJS**, **Redux**, and Ant Design.
 - Managed deployment pipelines to Azure-compatible environments (MonsterASP).

HCMUE Course Registration Simulation Sep 2025 – Nov 2025

Team Leader | Stack: NodeJS, ReactJS, MongoDB, PostgreSQL, AWS S3

- **Links:** GitHub Repo | Live Demo
- **Description:** High-complexity simulation handling enrollments, scheduling, and payments.

- **Responsibilities:**

- Designed core backbone architecture using **Clean Architecture** on **NodeJS**.
- Implemented logic for Enrollment and **AWS S3** integration on both FE & BE.
- Integrated payments: **ZaloPay, MoMo, VNPay**.

Education

University of Education - HCMUE, B.S. in IT

July 2023 – Present

GPA: **3.39/4.0**

- **Awards:** Academic Incentive Scholarship (Top 5, 2025 - Semester 2); AEON 1% Scholarship (2025-2027).

Research

Knowledge Graph for STEM Education

Sep 2025 – Present

- **Third Prize** in Student Scientific Research Competition – Faculty Level.
- Collaborated with the research team to define data models and build data structures.
- Implemented backend logic to ingest and structure data into the Knowledge Graph using **Neo4j**.
